Career Objective

Motivated and tech-savvy fresher with knowledge of Python and frontend development, seeking an entry-level opportunity to contribute and grow in software development.

Technical Skills

- **Python** — Basics
- **SQL** — Basics
- **Tools & Software** — MS Word , Microsoft Excel, GitHub, VS Code
- **Web Development** — Frontend Development (HTML) | Responsive Design

Projects

Personal Portfolio Website

Created a responsive personal website using HTML to showcase my resume, projects, and contact details.

Players Record Management System

A basic CRUD application that allows adding, updating, deleting, and viewing players records.

AI Grievance System

- Developed a full-stack civic complaint portal using Next.js, TypeScript, and Supabase with role-based dashboards.
- Integrated AI-powered complaint analysis, GPS camera, and voice-to-text features using Web APIs.
- Built real-time complaint tracking with automated notifications and Leaflet.js mapping.

Cricodemy, (Current Pursuing)

- Developed a smart cricket umpiring and live telecasting application using AI and computer vision.
- Implemented real-time ball tracking, player tracking, and automated decision-making features.
- Built modules for live score updates, wicket detection, boundary detection, and match statistics analysis.
